PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS. Investment return and principal value of an investment will fluctuate; therefore, an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Visit timothyplan.com for the most recent month-end performance.

The Dow Jones Moderate Portfolio Index is a member of the Relative Risk Index Series and designed to measure a total portfolio of stocks, bonds, and cash, allocated to represent an investor’s desired risk profile. The Dow Jones Moderate Portfolio Index risk level is set to 60% of the Dow Jones Global Stock CMAC Index’s downside risk (past 36 months). It is not possible to invest directly in an index.

The illustration is based on a hypothetical $10,000 investment in A Class shares. All results shown assume reinvestment of dividends and capital gains. The maximum sales load on Class A shares is 5.5%; the maximum CDSC on Class C shares is 1%.

**Fund Advisor**

Timothy Partners, Ltd., the Advisor to the Trust handles the day-to-day asset allocation of the Fund.

**Objective**

The investment objective of the Fund is to generate moderate levels of long-term capital growth.

**Strategy**

- The Conservative Growth Fund is an asset allocation fund that invests in other Timothy Plan Funds (the “Traditional Funds”). Within the guidelines in the prospectus, the Advisor determines the specific asset allocation program. Each day, the Conservative Growth Fund is open for business, the Advisor reviews the asset allocation program and reallocates, as necessary, for any new assets invested in the Fund. As necessary, TPL also reallocates the Conservative Growth Fund’s investments in the Traditional Funds at the end of each fiscal quarter to maintain the asset allocation program.
