PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS. Investment return and principal value of an investment will fluctuate; therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Bloomberg U.S. Aggregate Bond Index is composed of securities from Bloomberg Government/Corporate Bond Index, Mortgage-Backed Securities Index, and the Asset-Backed Securities Index. The index's total return consists of price appreciation/depreciation plus income as a % of the original investment. Indexes are rebalanced monthly by market capitalization. It is not possible to invest directly in an index.

The illustration is based on a hypothetical \$10,000 investment in A Class shares. All results shown assume reinvestment of dividends and capital gains. The maximum sales load on Class A shares is 5.5%; the maximum CDSC on Class C shares is 1%; Class I shares are no load shares which are available exclusively through registered investment advisors or for institutional accounts.

Fund Sub-Advisor

Barrow, Hanley, Mewhinney & Strauss, Inc. (BHMS) was founded in 1979 as a registered investment advisor, and has provided investment advisory services to institutional and individual investors since that time. BHMS is a subsidiary of BrightSphere Investment Group, a publicly-held company traded on the New York Stock Exchange.

Objective

The investment objective of this Fund is to generate a high level of current income consistent with prudent investment risk.

Strategy

- The Fund normally invests at least 80% of its assets in a diversified portfolio of corporate bonds, U.S. government and agency securities, convertible securities and preferred securities.
- The Investment Manager will only purchase securities for the Fund that are investment grade, with a rating of at least "BBB" as rated by Standard & Poor's or a comparable rating by another nationally recognized rating agency. The Fund may also invest in debt securities that have not been rated by one of the major rating agencies, so long as the Fund's Investment Manager has determined that the security is of comparable credit quality to similar rated securities.

Fund Risk

The Fund invests in investment-grade debt instruments which increase and decrease based on the prevailing interest rate movement, therefore the debt instruments will decline in value if the interest rates increase. There is also risk that the issuer will default and not make payments when due, resulting in a quality decline, and decline in value.

⁵ A bond rating is a grade given to bonds that indicates their credit quality. Bond ratings are expressed as letters ranging from "AAA", which is the highest grade, down through "D", which is the lowest grade and indicates the bond is in default. Different rating services use the same letter grades, but use various combinations of upper- and lower-case letters and modifiers to differentiate themselves.
